Monday

John Norrell Manufacturing Inc.

Little Rock, Arkansas 72207

Dear Mr Norrell

Enclosed find a bank check for $39. Please send me a quart of your Moly coating resin. I heard a story you might be interested in concerning coatings for guns. Barnes Bullets of American Fork, Utah is offering a teflon coating for sporting firearms. A man I know had stainless steel Browning A bolt hunting rifle coated. The gun came back with so much teflon in the chamber he could not get the bolt closed. He took the gun to a gunsmith, and after hearing that the coating had to be baked at 600 degrees for 30 minutes decided to Rockwell test the bolt lugs and receiver. Both tested at 23. A test on a non-teflon coated Browning produced a 38. When I heard the story I suggested that he try the Moly resin for his next gun.

Please send the Moly resin to :

Joseph L. [redacted]
