

Steppenwolf - A Weapons Supplier

~~XXXXXXXXXX~~
Ferndale, WA 98248 USA

Gentlemen:

After sitting around in my workroom for months I finally made use of the Moly Resin kit that you sent me. Since my workshop is, as usual, a total shambles, with 4 pistol projects on one bench and a variety of other strange things on the other bench I experimented with your product in my workshop annex--the kitchen.

With little preparation I coated the frame to a .32 auto I've been using as a test piece for a variety of experiments. The work turned out so well that I think I'm going to have to quit fooling around with this gun so that I don't ruin it. I may even sell it.

The wife, my most relentless critic, was not only impressed but she suggested that I consider coating a 1967 Mustang that I'm rebuilding. A totally absurd idea, I know, but only because I haven't got access, as yet, to a body shop's paint booth.

I'm so impressed with this stuff that I'm going to start offering it to my customers. I think they'll agree that the molly resin finish is just the thing for our wet climate.

Would you please send me a price quote for one gallon of molly resin?

Very truly yours,

Kevin ~~H. Es~~
