

Enclosed is a money order for \$36.00 + \$3.00 shipping. Please send me a quart of your Moly Resin.

I have used your product before, and am very pleased with the results. My first order was for the 10 oz. kit with the sprayer. When I received the kit, I noticed the sprayer was defective, as it was empty and had no pressure. I ended up using my automotive paint spray gun and air compressor with good results. Just thought I would let you know about the defective sprayer, so you are aware of it.

I would also like to know the "shelf life" of the moly resin, when it is stored unused. How long can I keep it in a sealed container, and should it be stored in a warm or cold environment? I did not see this information on your instruction sheets.

As I said before, I am very pleased with your product, and will recommend it to anyone. It is good to see a quality product which lives up to it's billing, in this world of false advertising and misrepresentation.

Thank You,
